

JAPAN PACK²⁰²³

Japan Packaging & Manufacturing Technology Show 2023

2023.10.3^{TUE} – 6^{FRI} Opening hours for visitors : 10 a.m. - 5 p.m.

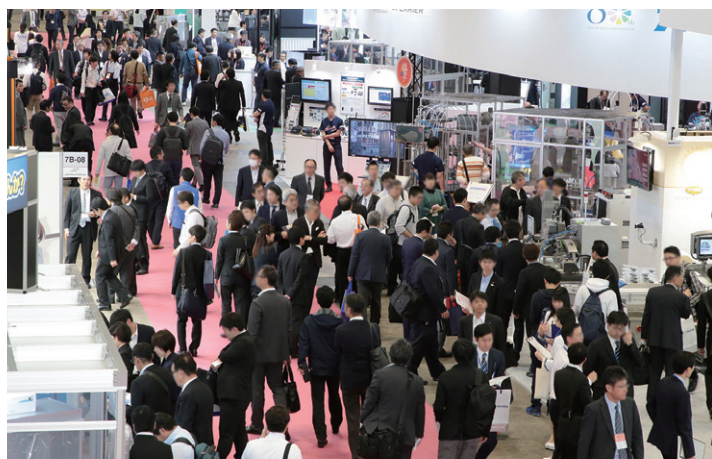

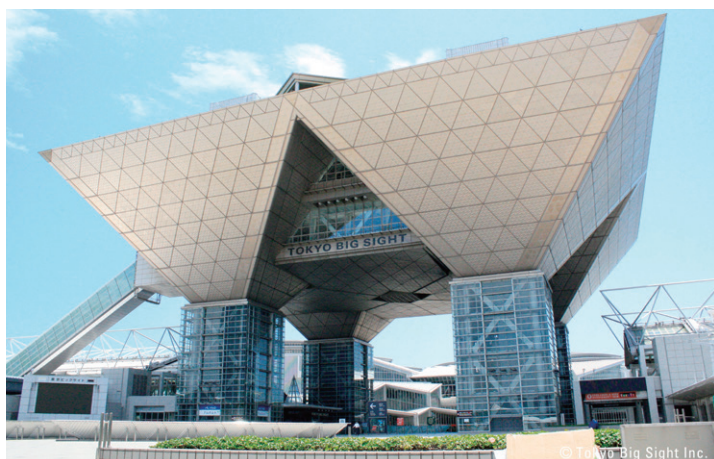

Tokyo Big Sight [East Exhibition Hall 2-6]

Organizer : Japan Packaging Machinery Manufacturers Association

Visit the official website, for the latest information and pre-registration. www.japanpack.jp

Japan Packaging & Manufacturing Technology Show is a large-scale exhibition for business held once every two years where the latest equipment, technology, and services of the packaging industry and related industries, as well as their users and buyers, come together under one roof.

Packing Formula to the Future

To the manufacturing industries such as food, pharmaceuticals and cosmetics, daily necessities, and industrial products

Provide solutions for issues such as DX promotion, labor shortages, manufacturing cost reduction, expiration date extension, product safety and security, appropriate use of plastics, saving energy and resources, and improving corporate value by promoting sustainability.

Create the value of
your products

To the retail distribution industry, such as supermarkets, convenience stores, drugstores, and e-commerce websites, etc.

Provide solutions for issues such as labor shortages, distribution costs, protecting products, stimulating purchasing motivation, packaging styles that are in harmony with daily life, reducing product loss, building collection-recycling networks, sanitation measures at sales sites and backyards, etc.

Create the value to
promote sales

To all of the Stakeholders

■ To realize sustainable society

Easy-to-handle packaging, easy-to-recycle packaging, super-aging society, diversification, ensuring hygiene.

■ Life cycle of packaging aware of environmental issues

Promote [3R +], ethical consumption, appropriate use of plastic, energy utilization of used packages, packaging industry, revitalization and development of related industries, human resource development, construction of a recycling-oriented society.

Declare the value of
SDGs × packaging

Exhibiting Theme

1 Supporting a Sustainable Society

Designing packaging plans based on the life cycle / Proper use of plastics /
Development of new materials and alternative materials / Utilizing energy from used packages / Promoting [3R +] /
Food loss and waste reduction / Extension of food life / Support for ethical consumption /
Products, technologies, and services that support a sustainable society

2 Productivity Enhancement and Automation

Strengthening of supply chains through DX / Optimization of supply chain management /
Incorporating diversity in production sites / Labor saving / Remote production system / Reduction of raw material loss /
Decrease of manufacturing costs through rationalization / Reduction of distribution and transportation costs /
Products, technologies, and services that contribute to automation and optimization at production line

3 Security and Safety

Ensuring hygiene / Protection of product quality, and reliability assurance in distribution / Prevention of counterfeit outflow /
Prevention of accidental eating and ingestion / Medication management / Quality assurance /
Compliance with packaging regulations / Technologies, services that support safety and security

4 Market Expansion

Acceleration of cross-industry collaboration / Business Continuity Planning /
Response to the remote work, and sharing economy / Changing dietary habits / Expansion of the EC market /
Export of Japanese products / Preparation of production bases / Promotion of corporate collaboration /
Nurturing human resources in the packaging industry / Inbound consumption /
Changing business practices and consumption through metaverse popularization /
Technologies, services in response to the market expansion of packaging and related industries

Exhibiting / Category

Group 1	Packaging Machinery, Packing Equipment
Group 2	Packaging Materials, Containers
Group 3	Printing Machinery, Related Equipment, Packaging Material Processing Machines
Group 4	Robots, Machine Component, Packaging-related Machines, Inspecting and Detecting Machines
Group 5	Food Processing Equipment, Related Equipment
Group 6	Pharmaceutical- and Cosmetic, Daily Necessities Making Machines, Related Equipment
Group 7	Ecology Related Equipment
Group 8	Sanitary Equipment, and Related Materials
Group 9	Logistics, and Related Equipment, Store Equipment
Group 10	Digital Solutions, Software
Group 11	Engineering, System
Group 12	Organization, Press, Research Institute, Educational Institute, Human Resource Support, Others

Prior registration is mandatory for all visitors to JAPAN PACK 2023.

We have introduced a prior registration system that permits non-contact participation.

*Prior registration will begin to be accepted in late July, 2023.

1 Access the official website.
Register on the page for prior visitor registration.

2 Print out the visitor pass (with a QR code) and bring it to the venue.

3 Put your visitor pass in a badge holder in the venue.
